

Subject: Internship Inquiry: B.Tech CSE Student from VIT Bhopal – Arun Chaudhary

Dear Hiring Team at Infosys,

I hope you are having a productive week.

I am writing to express my enthusiastic interest in a summer internship with Infosys. As a B.Tech Computer Science student at VIT Bhopal with a strong foundation in AI, Machine Learning, and core software development, I have long admired Infosys's leadership in digital transformation and its commitment to "navigating the next" for global enterprises. Currently, I serve as the Co-Lead of the Research Team at the GSoC Innovators Club, where I have honed my ability to lead technical initiatives and collaborate on complex problem-solving. My technical background aligns well with the innovative spirit at Infosys:

- **Programming & Logic:** Proficient in C++ and Java, with a focus on efficient data structures and algorithmic problem-solving.
- **AI/ML Focus:** Practical experience with search algorithms and PEAS models, complemented by a rigorous academic focus on Artificial Intelligence.
- **Analytical Skills:** A disciplined approach to technical analysis and a strong academic record in core engineering principles.

I am particularly drawn to Infosys because of your focus on continuous learning through platforms like Infosys Springboard and your reputation for nurturing young talent. I am eager to apply my skills to real-world projects and contribute to the high-quality solutions your team delivers to clients worldwide.

I have attached my resume for your review and would welcome the opportunity to discuss how my dedication and technical skills can add value to your team this summer.

Thank you for your time and consideration.

Best regards,

Aryan Mahendra
