

Digital Literacy Project Report

Name: Aryan Mahendra

Registration Number: 25BCE10483

Course: CSE0001 Digital Literacy

Program: B.Tech Computer Science and Engineering

University: VIT Bhopal University

Submitted To: Dr. Kannan

Date:31/03/2006

—

Introduction

Digital literacy refers to the ability to use digital devices, internet services, and online platforms in a safe and effective manner. In today's academic environment, students depend on digital tools for learning, communication, and project work.

The main aim of this project was to develop practical knowledge of digital platforms such as GitHub, coding websites, Google Forms, and professional communication methods. The project also focused on understanding cyber safety and responsible use of online resources.

All the tasks were completed step by step and organized in a GitHub repository. This report explains each task along with the work performed and learning outcomes.

Task 1 – Infographic Creation

In this task, a digital infographic was created using Canva to explain the concept of digital literacy. The infographic included topics such as basic digital tools, safe internet usage, and responsible online behaviour.

A suitable template was selected in Canva, and the content was added in a simple and clear format. After completing the design, the infographic was downloaded and uploaded to the GitHub repository.

This task helped in understanding how to present information visually using digital tools.

—

Task 2 – Digital Portfolio

In this task, profiles were created on different online platforms such as GitHub, LinkedIn, and StackOverflow. These platforms are important for building a professional online presence.

Basic details such as education and course information were added to the profiles. Screenshots of all profiles were taken and uploaded to the repository as proof of work.

This task helped in understanding how digital platforms can be used for learning and future career development.

This task involved using a coding platform and creating a Google Form. An account was created on HackerRank, and basic problems were solved to understand how coding platforms work.

A Google Form was created with multiple questions related to digital literacy. The form included different types of questions and was connected to a response sheet.

Screenshots of both the coding platform and the Google Form were uploaded to the repository. This task helped in learning online collaboration and data collection tools.

Discussions

Given an array of integers, find the sum of its elements.

For example, if the array $ar = [1, 2, 3]$, $1 + 2 + 3 = 6$, so return 6.

Function Description

Complete the `simpleArraySum` function with the following parameter(s):

- $ar[n]$: an array of integers

Returns

- int : the sum of the array elements

Input Format

The first line contains an integer, n , denoting the size of the array.
The second line contains n space-separated integers representing the array's elements.

Constraints

$0 < n, ar[i] \leq 1000$

Sample Input

STDIN	Function
6	<code>ar[]</code> size $n = 6$
1 2 3 4 10 11	<code>ar = [1, 2, 3, 4, 10, 11]</code>

Sample Output

31

```
23 if __name__ == '__main__':
24     fptr = open(os.environ['OUTPUT_PATH'], 'w')
25
26     ar_count = int(input().strip())
27
28     ar = list(map(int, input().rstrip().split()))
29
```

Digital Literacy Quiz

Form description

...

Question:1. You receive an urgent email from "Your Bank" asking you to click a link to verify your account details immediately because of a security breach. What is the most likely nature of this email?

- ☐ A) A helpful security update.
- ☐ B) A phishing attempt.
- ☐ C) A standard verification procedure.
- ☐ D) A newsletter.

Question 2: On a scale of 1 to 5, how confident are you in your ability to distinguish between a "sponsored" search result and an organic (unpaid) search result?

1 2 3 4 5

Not Confident ☐ ☐ ☐ ☐ ☐ Expert

Digital Literacy Quiz

Total points **2/4** ?

✓ **Question:1.** You receive an urgent email from "Your Bank" asking you to click a link to verify your account details immediately because of a security breach. What is the most likely nature of this email? 1/1

- ☐ A) A helpful security update.
- ☒ B) A phishing attempt. ✓
- ☐ C) A standard verification procedure.
- ☐ D) A newsletter.

✗ **Question 2:** On a scale of 1 to 5, how confident are you in your ability to distinguish between a "sponsored" search result and an organic (unpaid) search result? .../1

1 2 3 4 5

Not Confident ☐ ☐ ☒ ☐ ☐ Expert

✓ **Question 3:** Which of the following are characteristics of a strong, secure password? 1/1

Task 4 – Email and Social Media Etiquette

In this task, two professional emails were written to understand formal communication. One email was written for assignment submission, and the other was related to internship inquiry.

A checklist of social media do's and don'ts was also prepared to understand responsible online behaviour.

This task helped in improving communication skills and understanding proper usage of social media platforms.

Subject: Internship Inquiry: B.Tech CSE Student from VIT Bhopal – Arun Chaudhary

Dear Hiring Team at Infosys,

I hope you are having a productive week.

I am writing to express my enthusiastic interest in a summer internship with Infosys. As a B.Tech Computer Science student at VIT Bhopal with a strong foundation in AI, Machine Learning, and core software development, I have long admired Infosys's leadership in digital transformation and its commitment to "navigating the next" for global enterprises. Currently, I serve as the Co-Lead of the Research Team at the GSoC Innovators Club, where I have honed my ability to lead technical initiatives and collaborate on complex problem-solving. My technical background aligns well with the innovative spirit at Infosys:

- **Programming & Logic:** Proficient in C++ and Java, with a focus on efficient data structures and algorithmic problem-solving.
- **AI/ML Focus:** Practical experience with search algorithms and PEAS models, complemented by a rigorous academic focus on Artificial Intelligence.
- **Analytical Skills:** A disciplined approach to technical analysis and a strong academic record in core engineering principles.

I am particularly drawn to Infosys because of your focus on continuous learning through platforms like Infosys Springboard and your reputation for nurturing young talent. I am eager to apply my skills to real-world projects and contribute to the high-quality solutions your team delivers to clients worldwide.

I have attached my resume for your review and would welcome the opportunity to discuss how my dedication and technical skills can add value to your team this summer.

Thank you for your time and consideration.

Best regards,

Aryan Mahendra

Subject: Request for Extension: Digital Literacy Assignment Submission

Dear Dr. Jyoti,

I hope you are having a productive week.

I am writing to respectfully request an extension for the upcoming assignment in Digital Literacy, which is currently due on 30 March 2026.

Due to technical difficulties, I am finding it challenging to complete the work to the standard I aim for by the original deadline.

If possible, would you be open to granting me an extension until 4 April 2026? I am committed to submitting high-quality work and would greatly appreciate the extra time to ensure the assignment meets all requirements.

Thank you for your time and for considering my request.

Best regards,

Aryan Mahendra

Task 5 – Cybercrime Case Study

In this task, a case study on online UPI fraud was prepared. The case explained how attackers trick users into making payments through fake requests or messages.

A prevention checklist was also created, including safety measures such as verifying payment requests, avoiding unknown links, and not sharing personal details.

This task helped in understanding cyber risks and how to stay safe while using digital platforms.

(Insert Case Study and Prevention Checklist Here)

Cybercrime Case Study – Online UPI Fraud

Online UPI fraud is a common cybercrime where attackers trick users into sending money through fake payment requests or messages. This type of fraud is increasing due to the widespread use of digital payment applications.

In a typical case, a person receives a message or phone call claiming to be from a bank or payment service. The attacker may send a UPI collect request and ask the user to approve it for receiving money. Many users do not understand this and approve the request, which results in money being transferred from their account instead of receiving it.

In some cases, fraudsters also send fake QR codes or links and ask users to scan or click them. Once the user enters their details or approves the payment, the money is lost.

This case shows that lack of awareness about digital payments can lead to financial loss. Users should always verify payment requests and understand how UPI transactions work before taking any action.

Conclusion

This project helped in developing practical knowledge of digital tools and platforms. It improved skills such as creating content, managing online profiles, writing professional emails, and understanding cyber safety.

The use of GitHub for organizing all tasks also helped in learning how to present work in a structured manner. Overall, this project was useful in building essential digital skills required for students.
